**Category Name** Planning & Scheduling Design

**Actionee** ECS

**Sub Category**

**Subject** Scheduling of Command Procedures

**Description of Problem or Suggestion:**

Planning and scheduling allows only Activities to be entered onto Master Plan. Users have command procedures and commands they will want to schedule for execution. FOS proposed creating Pseudo Activities for procedures and commands, but this seems redundant and hard to manage and control naming conventions.

**Originator's Recommendation**

Allow the scheduling of commands and command procedures directly.

We agree with the recommendation to allow direct scheduling of commands and command procedures. The interface design with CMS has been changed so that they receive commands and command procedures directly from the Planning and Scheduling activity object. Therefore, users will be able to schedule commands and command procedures directly instead of pseudo-activities.
